SUMMARY

Motivated student pursuing triple majors in Computer Science, Mathematics, and Data Science, with prior professional experience as a Linux Systems Engineer. Skilled in Python, R, and C++, with an interest in combining programming concepts, problem-solving, statistics, and data analytics for solving real-world problems.

WORK EXPERIENCE

Linux Systems Engineer

Jul 2022 - Dec 2024

Administered and optimized Linux-based DNS and routing infrastructure, supported distributed ISP networks; maintained bare metal and virtualized server stacks, Hyper-V, ESXi, Dell EMC, with a focus on maximizing uptime and reliability; authored documentation to support NOC/Tier 1 routine monitoring; collaborated with Security Engineers to bolster company-wide security policies.

Contract Systems Engineering

Mar 2019 - Jul 2022

- Linux systems integration
- GPON/XGPON/LTE network deployment
- WiFi as a service
- Collaboration with FCC for grant compliance and demonstration of coverage

PROJECTS

BoE Raspberry Pi Project

[Link to Project](#)

Developed chassis drivers in Python and C++; massively expanded the usefulness of the BoE Bot Chassis; service-based software architecture facilitates reliable control of the chassis and servos via text-based commands.

AudioCW

[Link to Project](#)

Multi-semester exploration of CW/Morse code from a programming and data science perspective; developed code to transmit user keyboard input as audible tones; project was expanded to allow for audio receive capabilities with the goal of exploring DSP techniques and data visualization.

EDUCATION

2024 - present	Lyon College BA/BS	(GPA: 3.8/4.0)
2016 - 2018	University of Colorado	(GPA: 3.0/4.0)
2015	Elbert High School	(GPA: 4.2/4.0)

SKILLS AND ACCOMPLISHMENTS

Computer Science	Certified Python Programmer, Experience in C++, Certified LFCSA, MikroTik MTCNA, CBRs Operator
Other Notable	NHS & NCHS Member (Alpha Chi), Dean's List, HS Robotics Club Founder, FCC-licensed Radio Amateur (AI5YD)
